PROFESSIONAL SUMMARY

Computer Science graduate (LASU, 4.16 CGPA) who designs, builds, and deploys backend systems in Python (FastAPI), Node.js, and PHP. Experienced in REST API design, MySQL schema design, and production deployment, with a live booking platform in use. Currently building practical skills in AI integration with the Claude API and Model Context Protocol. Seeking a backend developer role where I can contribute to scalable system design.

WORK EXPERIENCE

HomeEase: Household Service Booking Platform 2025 – 2026
Final year project | Live at homeease-client.onrender.com

- Designed and built a full-stack booking platform connecting customers with household service providers across Lagos.
- Built RESTful API endpoints for authentication, booking management, and provider profile management.
- Structured the MySQL schema for normalized relationships and efficient queries; optimized slow queries.
- Deployed to Render with a CI/CD pipeline; implemented session management and input validation.

TechConnect: Tutor–Student Matching Application 2025
Industrial training (SIWES) | Lagos State Ministry of Science and Technology

- Developed a web application matching tutors with students across Lagos State, from requirements to deployment.
- Architected tutor and student account roles, the matching logic, and profile management with Flask and MySQL.

SKILLS AND CORE COMPETENCIES

Backend: Python (FastAPI), Node.js (Express), PHP, REST API design and implementation
Data: MySQL schema design, relational queries, query optimization
Frontend: HTML5, CSS3, JavaScript (DOM, events, async operations)
Tools: Git and GitHub, deployment on Render, API testing, Claude API and Model Context Protocol
Soft skills: Problem-solving, debugging, technical communication, teamwork

EDUCATION

Lagos State University (LASU) 2023 – 2026
Bachelor of Science (Hons), Computer Science | Second Class Upper Division | CGPA: 4.16
Relevant courses: Programming Language Principles, Computer Networks and Communication

CERTIFICATIONS

- Building with the Claude API, Anthropic
- Model Context Protocol: Advanced Topics, Anthropic
- Claude Code in Action, Anthropic
- Introduction to Agent Skills, Anthropic
- Claude on Google Cloud, Anthropic
- Claude in Amazon Bedrock, Anthropic

LEADERSHIP EXPERIENCE

Clerk and Deputy Speaker, Department 2023 – 2026

- Spearheaded the implementation of an e-voting system in the department, leading the technical rollout and change management.
- Collaborated with the Speaker to organise school tech conferences.

Speaker, Honourable Member, and Secretary 2023 – 2026

- Held multiple leadership positions in departmental governance.
